

Tenmile Creek Focus Area

Comparison of Bacteria Levels to Health Standards

Refer to the map on page 1 or the table on page 3 for site locations.

*The bar must be blue on both graphs for the sample site to be meeting the freshwater health standard.

Tenmile Creek Focus Area Historical Fecal Coliform Bacteria Data in FC/100mL

These tables provides the individual results at each station for the last thirteen months.

Results in light orange exceeded 200 FC/100mL. Results in dark orange exceed 1000 FC/100mL.

Gray box indicates an event where no sample was collected for varying reasons.

Data were collected by Tenmile Clean Water Project volunteers. Results in blue were collected by Whatcom County Public Works as a part of the routine Nooksack sampling run.
